REFERENCE FOR VECHARGE

Our experience with VeCharge has exceeded our expectations. The service, care and professionalism provided by James and Michael was very welcomed. We appreciated the initial and subsequent consultation for an electric vehicle charger installation that met our needs at Crown Gardens. Our work brief and specifications were met in full before during and after installation works including the electrical cabling installation, account management system, annual maintenance service and the highly efficient and high powered charging unit offered by VeCharge. From my investigations of charging system VeCharge was the only that enabled a fast charging, fully automated system that saved administration costs and allowed easy management of the vehicle charging system. Since the installation I, on behalf of the owners of Crown Gardens who commissioned the electric vehicle charger installation was presented with a community award from City of Sydney Lord Mayor Clover Moore. We have also been a reference point for the building manager of Horizon Apartments Sydney who has since had the VeCharge system installed at their building. Several other buildings have recently contacted us about our electric vehicle charger installation. We are very much are proud of our electric vehicle charging system and recommend the VeCharge system to any building due to the professional installation team and the excellent product offered by VeCharge.

Kind regards

Gabe di Palma
