Michael Brewitt – Director
VeCharge
4/4 Jabez St, Marrickville
NSW, 2204,

Dear Michael,

VeCharge has impressed us with the excellent customer service and workmanship during our EV infrastructure project. There were many technical challenges, such as limited power supply and site requirements. VeCharge was able to provide detailed advice and implemented all works in a professional manner.

Covid-19 restrictions and the high-end nature of the building required consistent and reliable communication, and VeCharge made sure the project progressed at a high standard and within budget. Disruption was kept at a minimum with site cleanliness being maintained at all times. We found the staff to be professional in their dealings with the building. Receiving constant clear communications from VeCharge enabled me to keep the committee and the residents up to date with the progress of the works.

Regards

Mario Caruana
